-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 is not at all understood since the algorithms are undefined in the claims.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-21 and 23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sonoda (5410322).

Regarding Claims 1-14,19-21 Sonoda shows, for example in Figures 11, a loaded antenna with radiator 2' and coplanar loading elements 21a-d disposed on the perimeter thereof, where the width of each loading strip is less than a quarter of the longest edge of the radiator 2a. Since the strips control resonant frequency, the skilled artisan would have found it obvious in considering such strips as "loading" the radiator element. As to Claim 5, the conducting surface 23a-d is also shown.

Regarding Claim 15, it would have been obvious to the skilled artisan to remove the central portion of the radiator as it is widely known it is at zero voltage potential.

Regarding Claim 17, it would have been obvious to the skilled artisan to pluralize the patch radiator and define a dipole.

Regarding Claim 23, an FSS is an obvious component of these antennas.

Regarding Claim 24, antennas are based upon algorithms as is well established and obvious to the skilled artisan.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (571) 272-1833. The examiner can normally be reached on M-F.
